DEDUCTIONS

Answer engines -8: The document contains neither a list nor a table.

Provenance -10: No about, contact, or impressum link was found.

Provenance -4: X-Content-Type-Options is not nosniff.

Document -6: 2 additional pages have at least 80 and fewer than 250 words in the HTML.

Answer engines -6: 4 additional pages have neither a list nor a table.

Answer engines -6: 10 additional pages do not open with a definitional verb.

HOLDS

The final response was HTTP 200.

The document was fetched over HTTPS.

No noindex directive was found on the document or its response headers.

robots.txt was fetched and does not disallow / for User-agent: *.

A canonical link is present and stays on the same host.

A sitemap responded HTTP 200 and lists 130 entries.

Title: "Zero Noise Report - Premium Market Intelligence Newsletter".

A meta description is present and within 50-170 characters.

One H1: "All Signal. Zero Noise."

The document language is "en".

1270 words were counted in main.

All 1 images have an alt attribute.

FAQPage structured data is present.

The first paragraph is definitional.

JSON-LD types: Organization, NewsMediaOrganization, WebSite, Product, VideoObject, FAQPage, BreadcrumbList, WebPage.

A publication or modification date is present.

An author is named.

llms.txt returned HTTP 200 and 5789 bytes.

Strict-Transport-Security is set.

The named URL was opened in a browser. The HTML response already held more words, so that count was kept.

19 additional pages on the host returned HTTP 200.

The crawl reached the cap of 20 pages.

NOT MEASURED

No ranking, impression, or click data was requested. None is reported.

No backlink graph, traffic estimate, or competitor set was consulted.

Core Web Vitals field data was not read. A single fetch duration is not a field metric.

The named URL is opened in a browser when this server has one. Up to 19 further URLs on the same host are fetched as HTML, judged, and named when a published check fails. The thinnest of those that returned words is also opened.

The others are not. The cap is 20 pages.

A mark of 100 means none of the published deductions in that dimension fired. It is not a rank and not a

certificate of quality.

THE FILE

A memorandum that was delivered is the product. Disagreeing with a mark is not a reason for a return. If a paid examination never produces a memorandum, write to founder@aiassessor.ca and the fee for that examination is returned. That is the whole rule.

No person wrote this file and no person reviewed it. The fetch, the marks, and the PDF are the same method every time. That is the labor policy: minimum human intervention, including none between payment and delivery.

The same choice is the emissions policy. There is no staffed second pass and no extra handling to count. A quantity of emissions avoided is not measured, so none is printed.
